

## TrueProp Software LLC launches new service to refresh older pitchometers.

Durham, New Hampshire - TrueProp Software LLC is more than just a software company. We are a marine technology services provider dedicated to revolutionizing the marine propeller inspection and repair industry.

Our TrueProp software is transforming the propeller repair community with device independent solutions. Except now we haven't stopped there. Not only are we continuing our device-independent philosophy by expanding compatibility to more devices - we're also assisting our TrueProp users keep their legacy digital pitchometers fully operational for the years to come.

So how are we doing this? Because TrueProp allows you to repurpose your existing propeller measurement equipment. For commercial devices such as MRI, Prop Scan, Prop View, and BladeRunner, TrueProp offers hardware connection kits to make running TrueProp Software simple and effortless!

## Are you losing valuable time due to a part problem...

---

Even the best machines have wear and tear, and suitable parts are getting harder to find as support for these legacy machines diminishes. Scales, encoders, cables, data boxes – these legacy machines have finite life spans. There’s more to worry about beyond software. Maintaining these pitchometers is critical to every propeller shop to stay in operation.

This is why TrueProp Software continues to breathe new life into older pitchometers with replacement parts, upgrade kits, and conversion hardware.

## Operating systems change...Make way for Windows 11.

---

The “last version of Windows ever” was awkwardly short. Microsoft recently announced the end of Windows 10 support in 2025 but rest assured, TrueProp Software is already preparing for updated compatibility.

You can depend on the TrueProp team for yearly software updates. Each new TrueProp release brings features and functionality to ensure our customers have the highest quality propeller inspection software available.

## Dedication and Commitment to Customer Support.

One of the strongest contributing factors in a business’s success is customer satisfaction. Our loyalty and commitment to quality and client success is well known. We consider our customers to be our partners and enjoy close-knit relationships. It is because of this collaborative connection, that we can provide the highest professional, effective, and innovative solutions. Our customers’ success is our success!
